OVERVIEW

Scape

Experience elevated audio

Scape is designed to provide gamers with a rich, immersive, and intuitive wireless audio experience. With custom-tuned drivers, ultra-low latency audio, and customizable EQ presets, Scape makes high-fidelity audio effortlessly enjoyable. Using a built-in switch, users can choose to connect to multiple devices via Bluetooth 5.3 or enjoy ultra-low latency 24-bit/96 kHz wireless audio. They can also communicate clearly thanks to the detachable microphone with flip-to-mute functionality, Super Wideband clarity and microphone noise cancellation. When it's time to step away, gamers can simply dock Scape in its magnet-assisted inductive charging stand, where it will recharge for up to 40 hours of continuous use, so it is always ready to pick up and play.

Designed for both performance and comfort, Scape features memory foam ear cushions, a lightweight frame with optimized support, and intuitive controls for controlling EQ modes, ambient lighting, and media playback. The ambient lighting and EQ presets are easily configured through Adjust Pro, a web browser-based online tool, and saved locally on the device. All these features are packaged into a Scandinavian take on headset design. Featuring soft fabric, sculpted lines, and scratch-resistant metal alloy accents — Scape offers a refined look that compliments its robust yet effortless functionality.

Key features

- ▶ Enjoy immersive gaming audio with custom-tuned drivers and EQ presets which can be adjusted to your preferred sound.
- ▶ Scape is always charged and ready — simply lift it up from its inductive charging stand to begin a gaming session.
- ▶ Enjoy up to 40 hours of continuous use before placing it in the stand with magnet-assisted docking to recharge between sessions.
- ▶ Communicate clearly with a detachable Super Wideband microphone featuring microphone noise cancellation.
- ▶ Cut the mic effortlessly with both flip-to-mute and press-to-mute microphone functions, complete with a mute LED indicator.
- ▶ Seamlessly connect to multiple devices with Bluetooth 5.3 or access ultra-low latency 24-bit/96 kHz wireless via included dongle.
- ▶ Create the right atmosphere with an adjustable ambient lighting array, complete with status indicator functionality.
- ▶ Fine-tune your lighting and audio without downloading software using Adjust Pro, an intuitive web-based configuration tool.
- ▶ Elevate your station with a sleek, Scandinavian take on headset design featuring scratch-resistant metal alloy details.
- ▶ Enjoy the lasting comfort of memory foam ear cushions and a lightweight, memory foam headband with carefully calibrated support.
- ▶ Easily control EQ modes, lighting and media playback with integrated buttons and adjust volume by turning the control crown.

Specifications
